An **In Depth Range** of Mobility Scooters

This section explains our range of scooters. Each one offering its own unique standard features and drive style.

Allowing you to live your life beyond limits...

Which Scooter is right for me?

Transportable Boot Scooter

Light Weight | Portable | Disassembles

L²

Scooters illustrated by this Symbol:

Small light travel scooters, which are easy to dismantle and can go at 4mph. These products can fit easily into most cars. Travel scooters are a lighter product meaning that there is a limit to weight capacity and battery size.

Mid-Range Scooter

Suspension | Larger Batteries | LED Lights

2

Scooters illustrated by this Symbol:

A sturdier type of scooter, which is capable of transporting a higher weight than lighter scooters and can travel at speeds of up to 4 mph. Some of our class 2 scooters can be dismantled, but they are heavier than L2 products.

8 MPH Scooter

High Weight Capacity | Suspension | LED Lights

3

Scooters illustrated by this Symbol:

A much heavier type of scooter, which is capable of carrying between 20 and 35st 10 lbs (up to a maximum of 39st 3lbs) in passenger weight. This scooter can also travel at speeds of 8mph on road (4 mph on pavements) and must be registered by the DVLA.
